

The Biotoxin and Chemical Residues in food **safefood** Networks are proud to present:

Annual Conference on Climate Change and Aquaculture

31st May 2011

at the Wellington Park Hotel, Belfast

This conference will bring together researchers, industry and regulators from the aquaculture sector across the island of Ireland to discuss key topics of interest and concern relating to the impact of climate change upon aquaculture and its produce. Topics include current and future concerns in aquaculture, advances in monitoring and surveillance techniques, development and implementation of prevention and control strategies, regulation and legislation. The purpose of the conference will be to provide networking opportunities for all stakeholders in this important industry on the island of Ireland.

To register your attendance or submit an abstract please go to
www.qub.ac.uk/safefoodnetworks

1-day rate € 50

safefood network members FREE

This will be followed by a one-day **Scientific Technical Workshop on Early Warning Systems: Emerging Technologies in Early Detection of Chemical Risks** at Queens University Belfast (1st June 2011). This workshop will cover a range of techniques including immunological methods, spectroscopic techniques and 'omics'. The workshop will include theoretical and practical sessions, along with examples of relevant applications for the aquaculture industry.
