

Roundwood IFA

Dear Sir or Madam,

On hearing that a Deer Management Strategy is being developed for Ireland our branch wishes to be involved in this partnership.

Please see accompanying submission on why the Roundwood branch should be involved.

The following are some of the points highlighted by our members.

Extensive damage to grass and fences reducing the availability of grazing grass for livestock.

Private gardens and vegetable plots being damaged

Deer have been visible in this area crossing roads and many accidents have occurred in recent times.

There is a risk of TB becoming widespread and affecting our herds.

Yours sincerely

Michael Gaffney sec
