SPRING CEREAL VARIETIES
IRISH RECOMMENDED LIST 2008

This leaflet contains a list of those varieties which have shown superior merit over a number of years in the Department’s Cereal Variety Evaluation Programme.

Growers should give preference to the varieties listed here unless there is strong evidence that some other variety registered on the National Catalogue of Agricultural Plant Varieties is more suited to their conditions. When large acreages are sown it is advisable to grow a number of varieties, chosen to minimise the effects of disease epidemics.

EVALUATION PROGRAMME

For spring barley and winter wheat, varieties are evaluated in National List trials initially. The most promising varieties are then entered into Recommended List trials after two years, or after one year if merited. For winter barley, oats and spring wheat, new varieties are entered into combined Recommended/National List trials. Trials are carried out at the Department’s variety evaluation centres at Backweston, Kildalton and Moorepark and on commercial farms recommended by Teagasc tillage advisors.

Varieties appearing on the list for the first time are Provisionally Recommended: spring barley and winter wheat having completed a minimum of two years in Recommended List trials and one year in National List trials; winter barley, oats and spring wheat having been evaluated for a minimum of three years in combined Recommended/National List trials. The eventual status of these varieties is determined by level of performance in ongoing trials; fully Recommended classification may be deemed merited after a further one to three years, or alternatively they may be removed from the list at any stage.

The suitability of those spring barley varieties on the Recommended List for their production under R.E.P.S. is determined from a minimum of three years evaluation on Department approved commercial R.E.P.S. farms.

VARIETY RATINGS

Variety ratings are derived from the mean of data from the 2005 – 2007 trials.

Yielding capacity of each variety is given as a percentage of control varieties (100). Yield ratings are from trials carried out in accordance with good commercial husbandry practices.

Actual data are given for 1000 grain weight, hectolitre weight, grain protein and kernel content.

Assessment of other characteristics is based on a scale of 1 to 9; a high figure is desirable and indicates possession of the characteristic to a high degree. For shortness of straw a difference of one point represents approximately 5 cm (2 inches). For earliness of ripening a difference of one point represents 2 days. Varieties with disease ratings of 8 or over are very resistant; 7 indicates good resistance and 6 moderate resistance; 5 indicates moderate susceptibility while 4 is rated susceptible; 1, 2 and 3 are very susceptible. Figures are bracketed where information is limited.

- **2006**: Cocktail, Frontier, Centurion, Doyen, Quench, Sebastian, Wicket
- **2007**: Cocktail, Frontier, Centurion, Doyen, Quench, Sebastian, Wicket

---

* Based on trial results from 2005, 2006 and 2007

♦/♣ Yields are expressed as a percentage of the mean of Cocktail and Frontier where—

♦ (100 = 7.58 t/ha @ 15% moisture content) and–

♣ (100 = 7.37t/ha @ 15% moisture content) under R.E.P.S. trialling for 2004, 2005 and 2006.
NOTES ON SPRING BARLEY VARIETIES

RECOMMENDED:

- Cross: (NFC 496/12 x Saloon) x (Linden x Thistle).
- Breeder/Irl Agent: New Farm Crops, Seed Technology Ltd.
- Seed Availability: 5 %.

FRONTIER: A Danish variety with high yield potential. Short moderately weak straw and moderately susceptible to straw breakdown. Moderately susceptible to mildew and *Rhynchosporium*. Moderately resistant to brown rust with good resistance to net blotch.
- Cross: (Tavern) x [Annabell x (Lux x Ferment)].
- Breeder/Irl Agent: Sejet, Power Seeds Ltd.
- Seed Availability: 7 %.

PROVISIONALLY RECOMMENDED:

- Cross: (Moypole x Spire).
- Breeder/Irl Agent: Ragt, Goldcrop Ltd.
- Seed Availability: 21 %.

- Cross: (Linden x Colada).
- Breeder/Irl Agent: New Farm Crops, Seed Technology Ltd.
- Seed Availability: 3 %.

- Cross: (Sebastian x Drum).
- Breeder/Irl Agent: New Farm Crops, Seed Technology Ltd.
- Seed Availability: 17 %.

SEBASTIAN: A Danish variety with good yield potential. Short moderately weak straw and moderately susceptible to straw breakdown. Moderately susceptible to mildew. Good resistance to brown rust and net blotch. Susceptible to *Rhynchosporium*.
- Cross: (Viskosa x Lux).
- Breeder/Irl Agent: Sejet, Power Seeds Ltd.
- Seed Availability: 8 %.

WICKET: A British variety with very high yield potential. Very short stiff straw and moderately resistant to straw breakdown. Moderately resistant to mildew and *Rhynchosporium*. Good resistance to brown rust. Moderately susceptible to net blotch. Late maturing.
- Cross: (Saloon x Tavern).
- Breeder/Irl Agent: New Farm Crops, Seed Technology Ltd.
- Seed Availability: 27 %.

♦ Yields are expressed as a percentage of Raffles and Trappe where (100 = 8.269 t/ha @ 15% moisture content)

**Note:** Data on grain protein, Hagberg falling number, hardness index, milling and bread-making quality are from results of analyses carried out by Teagasc at the National Food Centre.
NOTES ON SPRING WHEAT VARIETIES

RECOMMENDED

BYRON: A very high yielding British variety with short stiff straw. Moderately susceptible to Septoria spp. and mildew. Limited data suggests it has good resistance to yellow rust. **Byron is a feed variety and is unsuitable for bread-making.**

- Cross: Raffles x Imp.
- Breeder/Irl Agent: CPB Twyford Ltd, Goldcrop Ltd.
- Seed Availability: 19%*

RAFFLES: A high yielding British variety with moderately short stiff straw. Moderately susceptible to Septoria spp and mildew and has good resistance to yellow rust. Good milling and bread making quality.

- Cross: Shiraz x Cadenza.
- Breeder/Irl Agent: CPB Twyford Ltd, Goldcrop Ltd.
- Seed Availability: 64%*

TRAPPE: A high yielding German variety with a moderately tall stiff straw. Moderately resistant to Septoria spp, moderately susceptible to mildew and has moderate resistance to yellow rust. Good milling and bread making quality.

- Cross: B93689 x LP 2154/91
- Breeder/ Irl Agent: Lochow Petkus, Seed Technology Ltd
- Seed Availability: 11%*

♦ Yields are expressed as a percentage of the mean of Barra, Evita and Corrib where (100 = 7.226 t/ha @ 15% moisture).
NOTES ON SPRING OAT VARIETIES

RECOMMENDED

BARRA: A Swedish variety with moderately short and moderately weak straw. Very susceptible to mildew and susceptible to crown rust. Excellent grain quality.

- Cross: (Selma x KM1 MS).
- Breeder/Irl Agent: Svalöf Weibull AB, Goldcrop Ltd.
- Seed Availability: 59%*.

CORRIB: A high yielding German variety with short and very stiff straw. Very susceptible to mildew and moderately susceptible to crown rust. Good grain quality.

- Cross: (Berber x Adamo x SV).
- Breeder/Irl Agent: Lochow-Petkus GmbH, Seed Technology Ltd.
- Seed Availability: 19%*.

EVITA: A high yielding Belgian variety with short and moderately stiff straw. Susceptible to mildew and crown rust. Good grain quality.

- Cross: (Leanda x LP 8047).
- Breeder/Irl Agent: Lochow-Petkus GmbH, Seed Technology Ltd.
- Seed Availability: 7%*.

Important Notice:

The Department of Agriculture and Food has taken all due care in evaluating the performance of the listed varieties for yield, quality, disease resistance and the important agronomic characteristics, over a wide range of soils and environmental conditions, for a minimum period of three years. The Department of Agriculture and Food cannot, however, accept responsibility for any loss or inconvenience arising from any future variation in absolute or relative varietal performance.
