

1. Agri-Food Sector and the Economy

Key Indicators for Agri- Food Sectors	
	% of Total
% of GNI* (Modified Gross National Income) (2018)	7.5%
% of Employment (2018)	7.7%
% value of total exports (2018)	10.0%
% of all industry turnover accounted by the Food and Beverages Sector (2017)	12.0%

Source: CSO

Employment

Employment in the agri-food sector on average accounted for approximately 173,000 jobs, or 7.7% of total employment in 2018, according to the CSO Labour Force Survey.

Source: CSO, [Labour Force Survey, 2018](#)

Expenditure

Total public expenditure by Department of Agriculture, Food and the Marine was over €3 billion in 2018.

Payments to farmers totalled almost €1.8 billion including Single Farm Payment, Rural Development and Forestry Payments.

Expenditure on Irish Agriculture, 2018	
(Period 1 January to 31 December 2018)	€m
EAGGF Guarantee direct expenditure	€ 1,222
Voted Expenditure (excluding Administration)	€ 1,546
Administration	€ 237
Total Voted Expenditure	€1,783
Total DAFM Expenditure	€3,005

2. Farm Income and Structures

Estimates of Aggregate Agricultural Output, Input and Income.

The CSO's Advance estimate of Output, Input and Income, release in December, showed that aggregate farm income (operating surplus) increased by **+4%** to €2,962.8 million in 2019. This follows a decrease of **-16.8%** in 2018 vs 2017 figures. The overall value of goods output at producer prices decreased by **-2%**, or €167.2 million, to €8,014.5 million. Intermediate consumption decreased in value by **-4.1%** over 2019, to €5,752.9. The main items giving rise to this decrease in intermediate consumption are feeding stuffs and fertilisers, which decreased by €248.8 million (**-14.8%**) and €11.2m (**-1.9%**) respectively.

An analysis of the results for 2019 compared to 2018 identified the following main changes:

Milk production increased by **+7.4%** in volume, but reduced prices resulted in an overall increase of €126.5m (**+4.9%**) in the value of milk output, which rose from €2,555.4m to €2,681.9m.

The value of cattle output decreased by €277.8m (**-12.3%**) from €2,261.1m in 2018 to €1,983.3m in 2019. Underlying this decrease are both lower production volumes (**-6.1%**) and lower prices.

The value of pig production increased by **+14.4%** from €458.6m to €524.7m while the volume of pig production decreased by **-0.7%**.

Family Farm Income by system, 2018

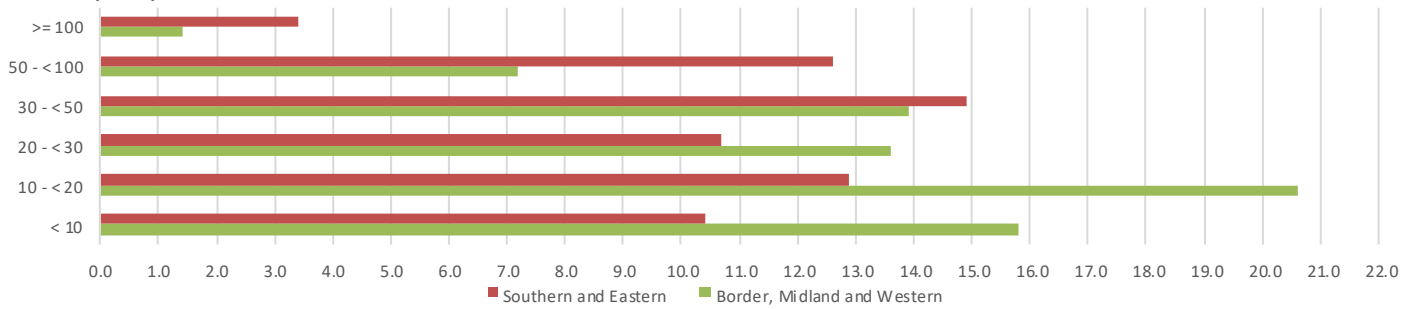

CSO Farm Structures Survey, 2016

According to the [CSO Farm Structures Survey, 2016](#) there were 137,500 farms in Ireland, 52.7% of which were located in the Border, Midland and Western (BMW) region. The average farm was 32.4 hectares. Farms in the Southern and Eastern (SE) region were 41.3% larger than those in the BMW region, with an average farm size of 38.3 hectares compared to 27.1 hectares.

Almost one in five of all farms (18.0%) were 50 hectares or more in size while just over two in five farms (43.4%) had less than 20 hectares. Over 60% of farms of 10 hectares or less were in the BMW region, while almost 70% of farms of 100 hectares or more were in the SE region. The number of farms and the average farm size remained relatively stable between 2013 and 2016.

Farm size (AAU) - Hectares

3. Agricultural Price Indices

The CSO's [Agricultural Price Indices](#) measures (a) index of producer prices of agricultural products - the Output Price Index, and (b) index of purchase prices of the means of agricultural production - the Input Price Index. The agricultural input price index decreased by **-0.2%** in October 2019 compared with September 2019. On an annual basis, the agricultural input price index decreased by **-1.1%** in October 2019 compared with October 2018. The agricultural output price index increased by **+1.4%** in October 2019 compared with September 2019. On an annual basis, agricultural output price index was down **-4.7%** in October 2019 compared with October 2018.

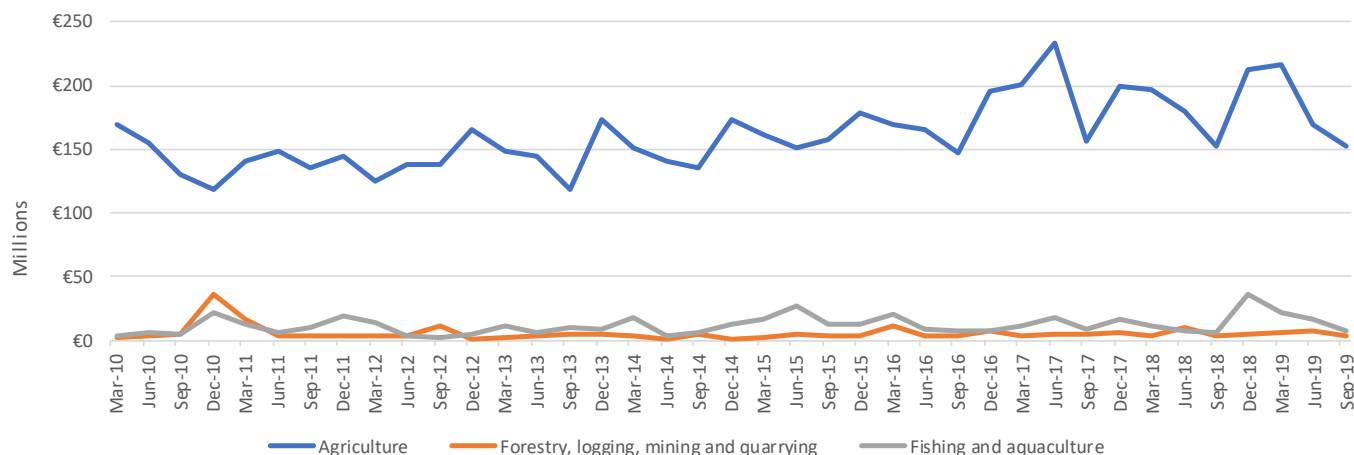

Agricultural Price Indices, 2018 - Year to date 2019 (Base 2015 = 100)

4. Agriculture Lending

New borrowings by Agriculture, Forestry and Fisheries SMEs, December 2019

New lending to the primary agriculture industries increased by 1% between March - September 2019 against the same period in 2018. New lending to the agricultural sector increased by 1% in the 1st three quarters of 2019 compared to the same period in 2018.

Brexit Loan Scheme

The €300 million Brexit Loan Scheme developed in cooperation with the Department of Business, Enterprise and Innovation (DBEI) and the Strategic Banking Corporation of Ireland (SBCI), provides working capital support to enable eligible Irish businesses to implement the necessary changes to address the challenges posed by Brexit. The Scheme opened for applications on 28 March 2018. To date it has sanctioned in excess of €47.4m in finance to over 218 SMEs, including €9.5m to 38 businesses operating in the food sector. Over 800 eligibility applications have been approved. Further information may be found via the following link: <https://www.agriculture.gov.ie/agri-foodindustry/agri-foodandtheconomy/agri-foodbusiness/brexitloanscheme/>

Future Growth Loan Scheme

The Future Growth Loan Scheme has been developed by DAFM and DBEI in partnership with the Department of Finance, SBCI and the European Investment Fund (EIF). It will be delivered through participating finance providers and make up to €300 million of investment loans available to eligible Irish businesses, including farmers and the agri-food & seafood sectors.

This is a long-awaited source of finance for young and new entrant farmers, especially the cohort who do not have high levels of security. It will also serve smaller-scale farmers, who often do not have the leverage to negotiate for more favourable terms with their banking institution.

Food companies have identified long term investment finance of up to ten years as a critical need which to date has been unavailable in Ireland. The delivery of this product and its effects will be felt all along the food production chain from primary producer to processor.

The loans will be competitively priced, will be for terms of **8-10 years** and will support strategic long-term investment in a post-Brexit environment. There is a minimum loan amount of €100,000 for SMEs or **€50,000** for primary agriculture. The maximum loan amount is **€3,000,000** and loans of **under €500,000 will be made on an unsecured basis**. There will be €50 million to €60 million available initially for farmers, within an **overall agri-food package of €120 million**. Should demand exceed these levels, this can be reviewed.

In December 2019 over 2200 applications for the scheme had been accepted, 782 of which related to primary Agriculture. 615 loans have been sanctioned to date, worth almost 117m

The Scheme was launched on the 27th of March 2019 and will run for three years. Eligibility applications may be made via the SBCI website www.sbc.gov.ie

5. Agri-Food Sector and the Environment

Agriculture has a key role to play in helping meet these GHG emissions and energy related targets. Our absolute agricultural GHG emissions rank 8th across EU, contributing approx. 4.4% of EU agricultural emissions.

The Green Low Carbon Agri-environment Scheme pays farmers to promote biodiversity, protect water quality, and also to help combat climate change on their farms. GLAS was launched in 2015 and supports farmers to manage lands of conservation value. To date 50,000 farmers have been issued €589 million as part of GLAS payments. GLAS payments amounted to €230 million in 2018. To date in 2019 €151.5 million of GLAS payments have been paid to 42,679 farmers.

The Beef Data Genomics Programme (BDGP) is one of a range of sustainability actions for Irish Agriculture under Ireland's Rural Development Programme. BDGP is designed to accelerate genetic improvements in the quality of the beef herd, leading to associated climate benefits such as reduced emission intensity. Payments totalling €179 million have been issued from 2015-2018 to over 23,000 farmers.
