

Euroforest Timber Ireland Ltd

Dear Sir/Madam

Euroforest Timber Ireland Ltd are a forest management, timber harvesting and marketing company. Core to this business, which was founded in 2017, is forest road and felling licence approvals. The shareholders have invested €1.2 million in the business to date.

The foundation of this business is the private sector timber coming to the market over the next 2 decades. This timber is in place due to the state investment in private forestry of C. €3 billion. This investment is now being decimated by the prevailing licence application and appeals process. This is not acceptable.

I support the draft agriculture appeals (amendment) bill 2020.

Regards,
