

## **SWS Forestry**

Good Day.

I am writing this with the hope that somebody will stop and look at what is not working in the appeals section,

Everybody agrees there needs to be an appeals section, when a person puts a submission forward and ultimately an objection surely this could be dealt with swiftly before the added expense of an NIS.

How can the industry expect a land owner or a forestry company bare the cost of an NIS and possibly have the application turned down later

If an application goes into appeals ,is it not possible to give an exact time frame for the hearing
