Hi Paddy Sleeman here from BEE UCC

Section 3:2 reads badly. Perhaps spilt it up ?

It reads as if there are only financial consequences of RTA which is barbaric, clearly these accidents cause injury or even death of people, plus brutal injuries to the deer.

There is an international legal commitment to halting loss of biodiversity, given that Ireland's native flora evolved in absence of deer for a long time, this needs seperation of purely economic issues.

Best

Paddy Sleeman
